- ◆ Radar can be integrated with 360 vision system (option) automatically reminding the driver when danger occurs.
- ◆ Warranty 1 year

## High definition camera

### 360 ° VISION SYSTEM

## NBS DF117

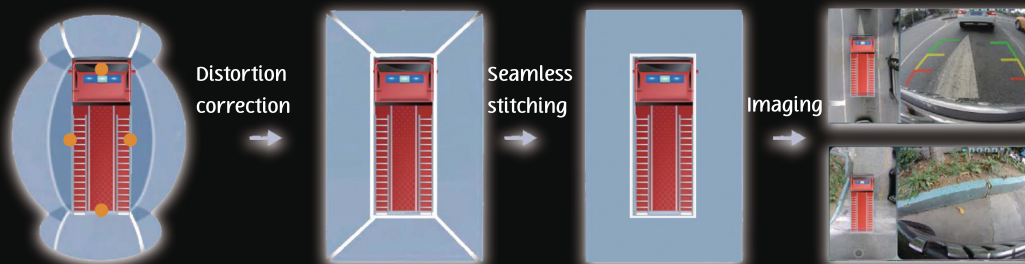

The NBS 360 ° panoramic camera system provides a true surround vision of driving with 1080P HD image. Due to their size and length, some equipment has more than one blind spot. The 360° system covers all of these blind spots using a single system for safer driving.

It is specially designed for trucks, buses, heavy vehicles and much more.

## Real bird's eye view around your vehicle.

NBS panoramic vision system provides clear rear, front and side view of your driving simultaneously. It allows a synthesis of panoramic images; it corrects the distortion of the image to seamlessly assemble and restore a 3D scene in real time. The 360° vision displays the real driving scenario and allows you to obtain a real bird's eye view around your vehicle.
